

Salary	£36k
Contract Type	Permanent, Full-Time
Location	Wigan

JOB SUMMARY

We are looking for a passionate advocate of user-centred design to join our small, welcoming team. We're working on a fresh, new product for an industry where dull UI and awkward UX is still the norm. This is an opportunity to design and implement a new JavaScript-based SPA UI for a suite of products that sets a new benchmark and wows users.

RESPONSIBILITIES

- * Leading the design and implementation of a brand new suite of software for the UK energy market.
- * Understanding the scenarios and business processes used by the UK energy suppliers.
- * Producing wireframes and prototypes to design, share and test designs.
- * Developing the agreed designs and supporting their use in pre-production and production systems.
- * Working with back-end developers to shape REST APIs and BFFs.
- * Occasionally travelling and work with our clients throughout the UK.

QUALIFICATIONS

- * Strong knowledge of HTML5, JavaScript frameworks, CSS and associated tooling.
- * Minimum of 5 years' experience in front-end development and involvement in UX.

ADVANTAGES

- * Knowledge and experience of micro-front-ends.
- * Familiarity with ASP.NET or C# for a better understanding of our back-end technology.
- * Experience of working with UK energy suppliers.

ATTRIBUTES

- * Passion for great design.
- * Experience of working within an agile team.
- * Strong communication skills.

- * Tenacity, dedication and inclination to lead.
- * The ability to challenge convention and innovate.

OTHER RESPONSIBILITIES

- * Establishing and standardising operational process within the business.
- * Occasional mentoring of apprentices.
