

Salary	£55k
Contract Type	Permanent, Full-Time
Location	Wigan

JOB SUMMARY

We are looking for a senior C# developer to join our small, welcoming team. We're working on something brand new from the ground up; a suite of products that sets a new benchmark and wows users. Join us in breaking ground on something that's built right from the outset; no need to maintain legacy code!

RESPONSIBILITIES

- * Leading a small team of developers in the design and implementation of a brand-new suite of software for the UK energy market.
- * Understanding the scenarios and business processes used by the UK energy suppliers.
- * Designing microservice systems by decomposing high-level business requirements into lower level design.
- * Developing the agreed designs and supporting their use in pre-production and production systems.
- * Working with front-end developers to shape REST APIs and BFFs.
- * Wrangling data - including SQL and No-SQL databases.
- * Occasionally travelling and work with our clients throughout the UK.

QUALIFICATIONS

- * Minimum of 5 years' experience in C# development and ASP.NET (REST Web APIs).
- * Strong command of Microsoft SQL Server and T-SQL.

ADVANTAGES

Additional experience with *any* of the following is an advantage:

- * .NET Core / Standard
- * Microsoft Azure
- * Linux, Docker or Kubernetes.
- * JavaScript-based front-end frameworks.
- * Working with UK energy suppliers.

ATTRIBUTES

- * Passion for great design.
- * Experience of working within an agile team.
- * Strong communication skills.
- * Tenacity, dedication and inclination to lead.
- * The ability to challenge convention and innovate.

OTHER RESPONSIBILITIES

- * Establishing and standardising operational process within the business.
- * Occasional mentoring of apprentices and junior developers.
